March 11, 1980

Mr. Louis D. Meneghin
14840 Minerva Avenue
Dolton, Illinois 60419

Dear Mr. Meneghin:

A review of our files indicates that no quarterly water monitoring analyses were received from the above-captioned site for the quarters ending April 15, 1979, July 15, 1979, October 15, 1979, and January 15, 1980. As required by Rule 317 of the Rules and Regulations on Solid Waste and special conditions of your permit numbered 1976-24-OP, the monitor wells G101 and G102 shall be sampled and analyzed quarterly for ammonia, boron, COD, chloride, and R.O.E. Furthermore, if a monitor well is dry, it shall be reported as such. The analyses are due at this office on or before the 15th day of January, April, July, and October of each year.

Failure to comply with Rule 317 and the special conditions of your permit may result in a request for legal action pursuant to enforcement provisions of the Environmental Protection Act.

We request that you acknowledge receipt of this letter and indicate your plans to correct the aforementioned violation within 15 days.

Sincerely,

Rauf Piskin, Manager
Hydrogeology Unit
Division of Land/Noise Pollution Control
